Budget Monitor Tips and Tricks

Hiding Columns

All chartfields are required when establishing a Budget Monitor. Users can hide columns on the monitor after it is established. To change the view: Budget Monitor/View/Columns.

Adding Columns

By default, descriptions are not displayed. You can add additional columns however to show them.

While on your Budget Monitor, select view/columns – then check the boxes next to what columns you want to see.

Export

Users can also work with the data on their screen in Excel by using the Export to Excel feature.

Narrow Results

If the Budget Monitor was set at a high level, users can drill down into data, and then search on specific items. Example – Budget Monitor is set for All Expense Accounts. User drills down on Expenses, but only wants to see 603003. Enter the account number is the search box above Account. When finished, select 'Done' to return to main Budget Monitor.

Deleting Old Budget Account Groups

If there are Account Groups that are no longer needed, select View/Manage. Highlight the row no longer needed, and select the 'X' to delete.

Selecting Accounts for the Budget Monitor

Any Parent Level (Parent 5 – REVALL; Parent 2 – RIT001 etc) can be used when setting up a budget monitor. Users may also opt to set up individual accounts (child accounts not listed here). The child accounts are where expenses/revenues post. This allows each user to customize their view to meet their specific needs.

Any level listed can be used as an account to set up a Budget Monitor						
Parent5	Parent4	Parent3	Parent2	Parent1	Child	Description
REVALL						All Revenue
	R40000					Revenues
		RTF001				Tuition and Fees
