

General Elective and Upper Level Credit Calculation Tool

Reminder: Students are expected to track their official completion of graduation requirements using the Academic Requirement Report available on their student account. This is only a tool to guide course planning.

Completing only Major and University Core requirements will not satisfy your 120-credit requirement. You must also calculate if you have met the 32 Upper Level (UL) Credit requirement. Use the following method to determine how many free electives you may need and if any must be upper (3- or 400) level courses:

- a. Total all completed credits, including those transferred to Towson _____
- b. Total the number of required credits remaining – Major and CORE – and add to the number in line a.
TOTAL: _____
 - i. If total is less than 120, subtract it from 120 to determine the number of free elective credits you need
GENERAL ELECTIVE CREDITS NEEDED: _____
 - ii. If total is 120 or more, you may not need any free elective credits; continue to check UL requirement
- c. Add together credits, completed and planned, from courses at the 3- or 400 level: _____
 - i. If total is less than 32, subtract it from 32 to determine the number of UL free elective credits you need
UL GENERAL ELECTIVE CREDITS NEEDED: _____
 - ii. If the total is 32 or more, you do not need any UL free elective credits

Suggested free elective credits, if not already taken for CORE categories, include COMM 131, COSC 111, and PSYC 101
