

Subject Pool Inclusion Report Towson University

Spring 2013

The Faculty Resources Committee is working to create a MCCS departmental subject pool to aid faculty in their research endeavors. One of the most difficult tasks in completing a research project is finding participants. Therefore, we are asking all faculty (part and full time) to consider including their classes in the subject pool. As the instructor/professor, you have complete say over your classes' participation (e.g., how many times, what type of research, extra credit points). If you are willing to participate in the subject pool, then please fill out the following information for each class you teach and return this form by February 15, 2013 to CJ Claus at cclaus@towson.edu
